

Description

ANTIBLAZE TMCP flame retardant is a neutral, chlorinated phosphate ester. This additive flame retardant may be combined in either side of a two-component urethane-package system to achieve outstanding long-term storage stability. Excellent flame resistance is obtained by adding low levels of this economical flame retardant to rigid urethane and isocyanurate foams.

Applications

ANTIBLAZE TMCP flame retardant may also be used in flexible urethane foams, coatings, acrylic latices, vinyl copolymers, nitrocellulose lacquers and epoxy resins.

Typical Properties*

Appearance	liquid
Specific gravity @ 20 °C	1.29
Viscosity, cps @ 20 °C	78
Density, lbs/gal	10.75
Acid number, mg KOH/g	0.1
Phosphorus, %	9.4
Chlorine, %	33.0

*These properties are typical but do not constitute a specification either in part or as a whole. Specification data is available on request from sales, customer service or customer technical service.
